

POLLOCK'S TOY MUSEUM

Jumping Jack Instructions

These instructions are for any of the characters.

You will need:

1. Your Jumping Jack Sheet
2. Scissors
3. Thin String (e.g thread)
4. Thick String (e.g twine)
5. Sewing Needle
6. Hole Punch
7. Brass Split pins
8. Optional: craft knife and cutting mat.

Firstly, cut out all the limbs and body with the scissors...

Next, use a
hole punch or
a craft knife
to make holes
at all the
joint points
like in the
image...

Attach all
limbs to body
using split
pins making
sure all the
limbs are
behind the
body...

Next, attach the top of the arms together with some thread (we used a needle to do this) then repeat for the legs. Your placement of the thread will determine the movement...

Now attach the thicker string to the pieces of thread connecting the arms and legs. Some string should be left dangling between the legs...

Last step is to
make a loop in
the top so you
can hang your
Jumping Jack.

We used a
needled and
thead for this
as well....

Finished!
